AMUSE Seminar – 11 November 2004

Introduction

AMUSE (*A Mobility Trial with UMTS/WLAN Seamlessly*) was a trial initiated by Eindhoven University of Technology (TU/e), which was supported by SURFnet and Vodafone NL. During the trial, 25 students were equipped with Wireless LAN and Vodafone UMTS/GPRS. To be trialled was a combination of Mobile IP for seamless roaming on IP networks and 802.1x/EAP-SIM for secure authentication and encryption at WLAN hotspots.

The trial goals were to get a proof of concept, get hands-on experience on the technologies and get user experiences via questionnaires.

The trial has successfully finished at the end of May 2004.

The seminar is intended to create awareness of the used technologies by giving a demo and presenting some of the trial results, other interesting projects and technologies, and near-future products that might be interesting for Vodafone.

Program

<i>start</i>	<i>end</i>	<i>item</i>	<i>speaker</i>	<i>job title / department</i>	<i>organisation</i>
13:30	13:40	<i>opening</i>	Alfons Jongen	Manager TS&I	Vodafone NL
13:45	14:05	presentation	Klaas Wierenga	Manager Middleware Services	SURFnet
14:10	14:25	presentation	Jacco Kwaaitaal	project manager	TU/e
14:30	14:50	presentation	Alejandro López	researcher telecom	TU/e
14:55	15:20	pres + demo	Tom van Sebille	engineer	Vodafone NL
15:20	15:40	<i>coffee break</i>			
15:40	15:55	presentation	Renze Zijlstra		ProRail
